

AMAN MADDHESHIYA

AI SaaS Engineer and Founder | CreatorDash | 20+ Global Clients | 1M+ Users

@ developeramanyt@gmail.com (+91) 9140517360 aman-dev.is-a.dev LinkedIn GitHub

SUMMARY

AI SaaS Engineer who thinks in products, not just code. Built and shipped CreatorDash (500+ early access creators), scaled CodeSaas to 10K users in 2 months, and delivered 15+ systems for 20+ global clients reaching 1M+ users. Specializes in fast MVP execution, AI integrations, and scalable full-stack architecture.

SKILLS

Frontend:

React

Next.js

TypeScript

TailwindCSS

Redux

Zustand

React Native

Backend:

Node.js

Hono.js

Fastify

Express

Bun

BullMQ

REST API

WebSockets

GraphQL

Data & DevOps:

PostgreSQL

MongoDB

Redis

Prisma

Docker

Kubernetes

CI/CD

Microservices

AI:

OpenAI

Replicate

Hugging Face

Prompt Engineering

Vector Embeddings

EXPERIENCE

Full-Stack Developer, Part-time – Creatiz.ai

Oct 2025 – Present

- Led full frontend revamp migrating from Material-UI to Tailwind CSS with shadcn/ui, rebuilding 90% of the app and shipping to production.
- Shipped multiple new features across the full stack using Agile workflows; improved backend reliability via refactoring and unit tests.

Frontend Lead – Genflix

2023 – Present

- Joined during early stages; worked directly with the Director to translate business vision into scalable product solutions, contributing to architecture planning, hiring, and technical documentation.
- Rejoined in a new growth phase as Frontend Lead – driving architecture, feature delivery, and cross-team coordination between designers, QA, and backend developers using React, Next.js, TypeScript, and Tailwind CSS.

Founder – CreatorDash and CodeSaas

2022 – Present

- Building CreatorDash – unified analytics for creators across channels; 500+ early access creators onboarded. Previously scaled CodeSaas solo to 10K users in 2 months before sunseting.
- Delivered 15+ full-stack projects for 20+ global clients reaching 1M+ users; cut infra costs 25% and latency 60% via microservices; engineered Neuron platform with 8 role-based dashboards, boosting team productivity by 40%.

Full-Stack Developer, Contract – Workwalla

Mar 2025 – Nov 2025

- Built two production React Native apps (client and contractor-side) for end-to-end hiring and workforce management; architected multi-role system with distinct dashboards per role.
- Shipped Workwalla Coin, referral and earn system, wallet, live tracking, and real-time WebSocket messaging using React Native, Node.js, and Redis.

Full-Stack Developer – Pesu Venture Labs

Feb 2024 – Jul 2024

- Elevated 4 SaaS platforms with 10x speed gains via caching, query optimization, and microservices architecture.
- Implemented LLM-powered automation in Kubernetes and Docker, cutting manual workflows by 70%.

EDUCATION

B.Tech, Computer Science and Engineering

Jun 2020 – Jul 2024 | KIPM College of Engineering and Technology

- Final year project: Built a full-stack collaborative task management platform with real-time sync using WebSockets and Node.js.

ACHIEVEMENTS AND CERTIFICATIONS

- Top-6 Finalist, Asia-Pacific – IIT-Bombay National Competition (2021–22)
- Top-20 Finalist – Web3 Innovation Hackathon; blockchain and smart contract development
- HacktoberFest 2023 – Contributions to 10+ open-source repos, 500+ lines merged
- MicroA1 Full-Stack Developer Exam – Successfully passed – View Certificate
- TestDome JS Gold Card – View Certificate
